

Outdoor Elbow Install Guide

Required parts for install:

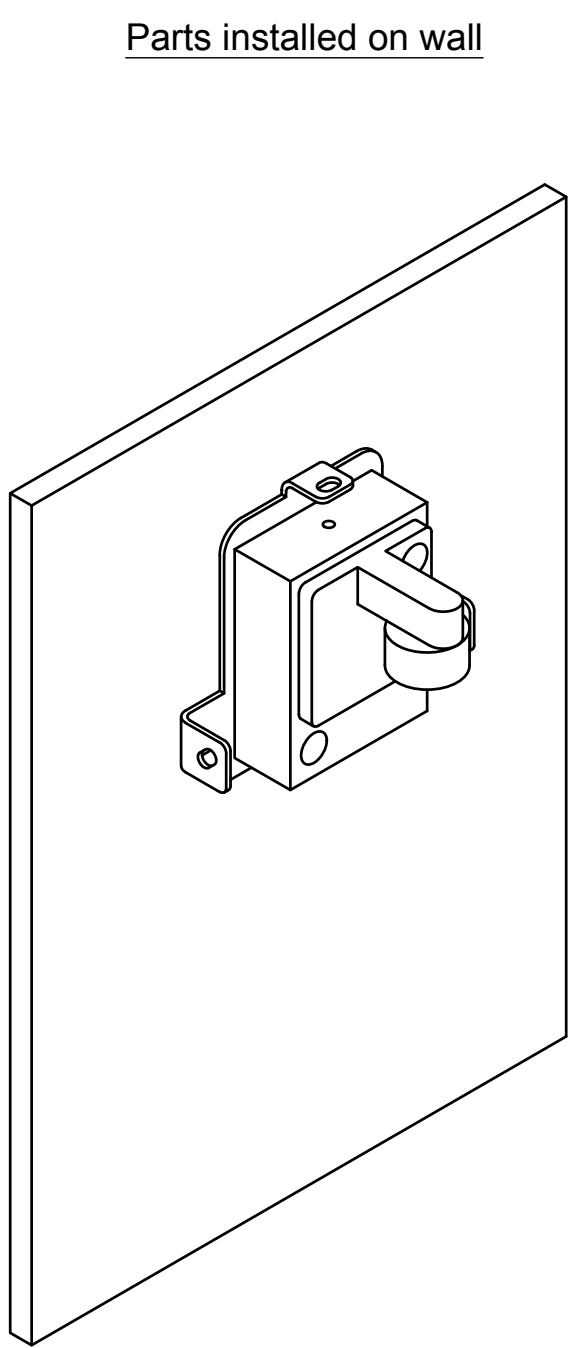

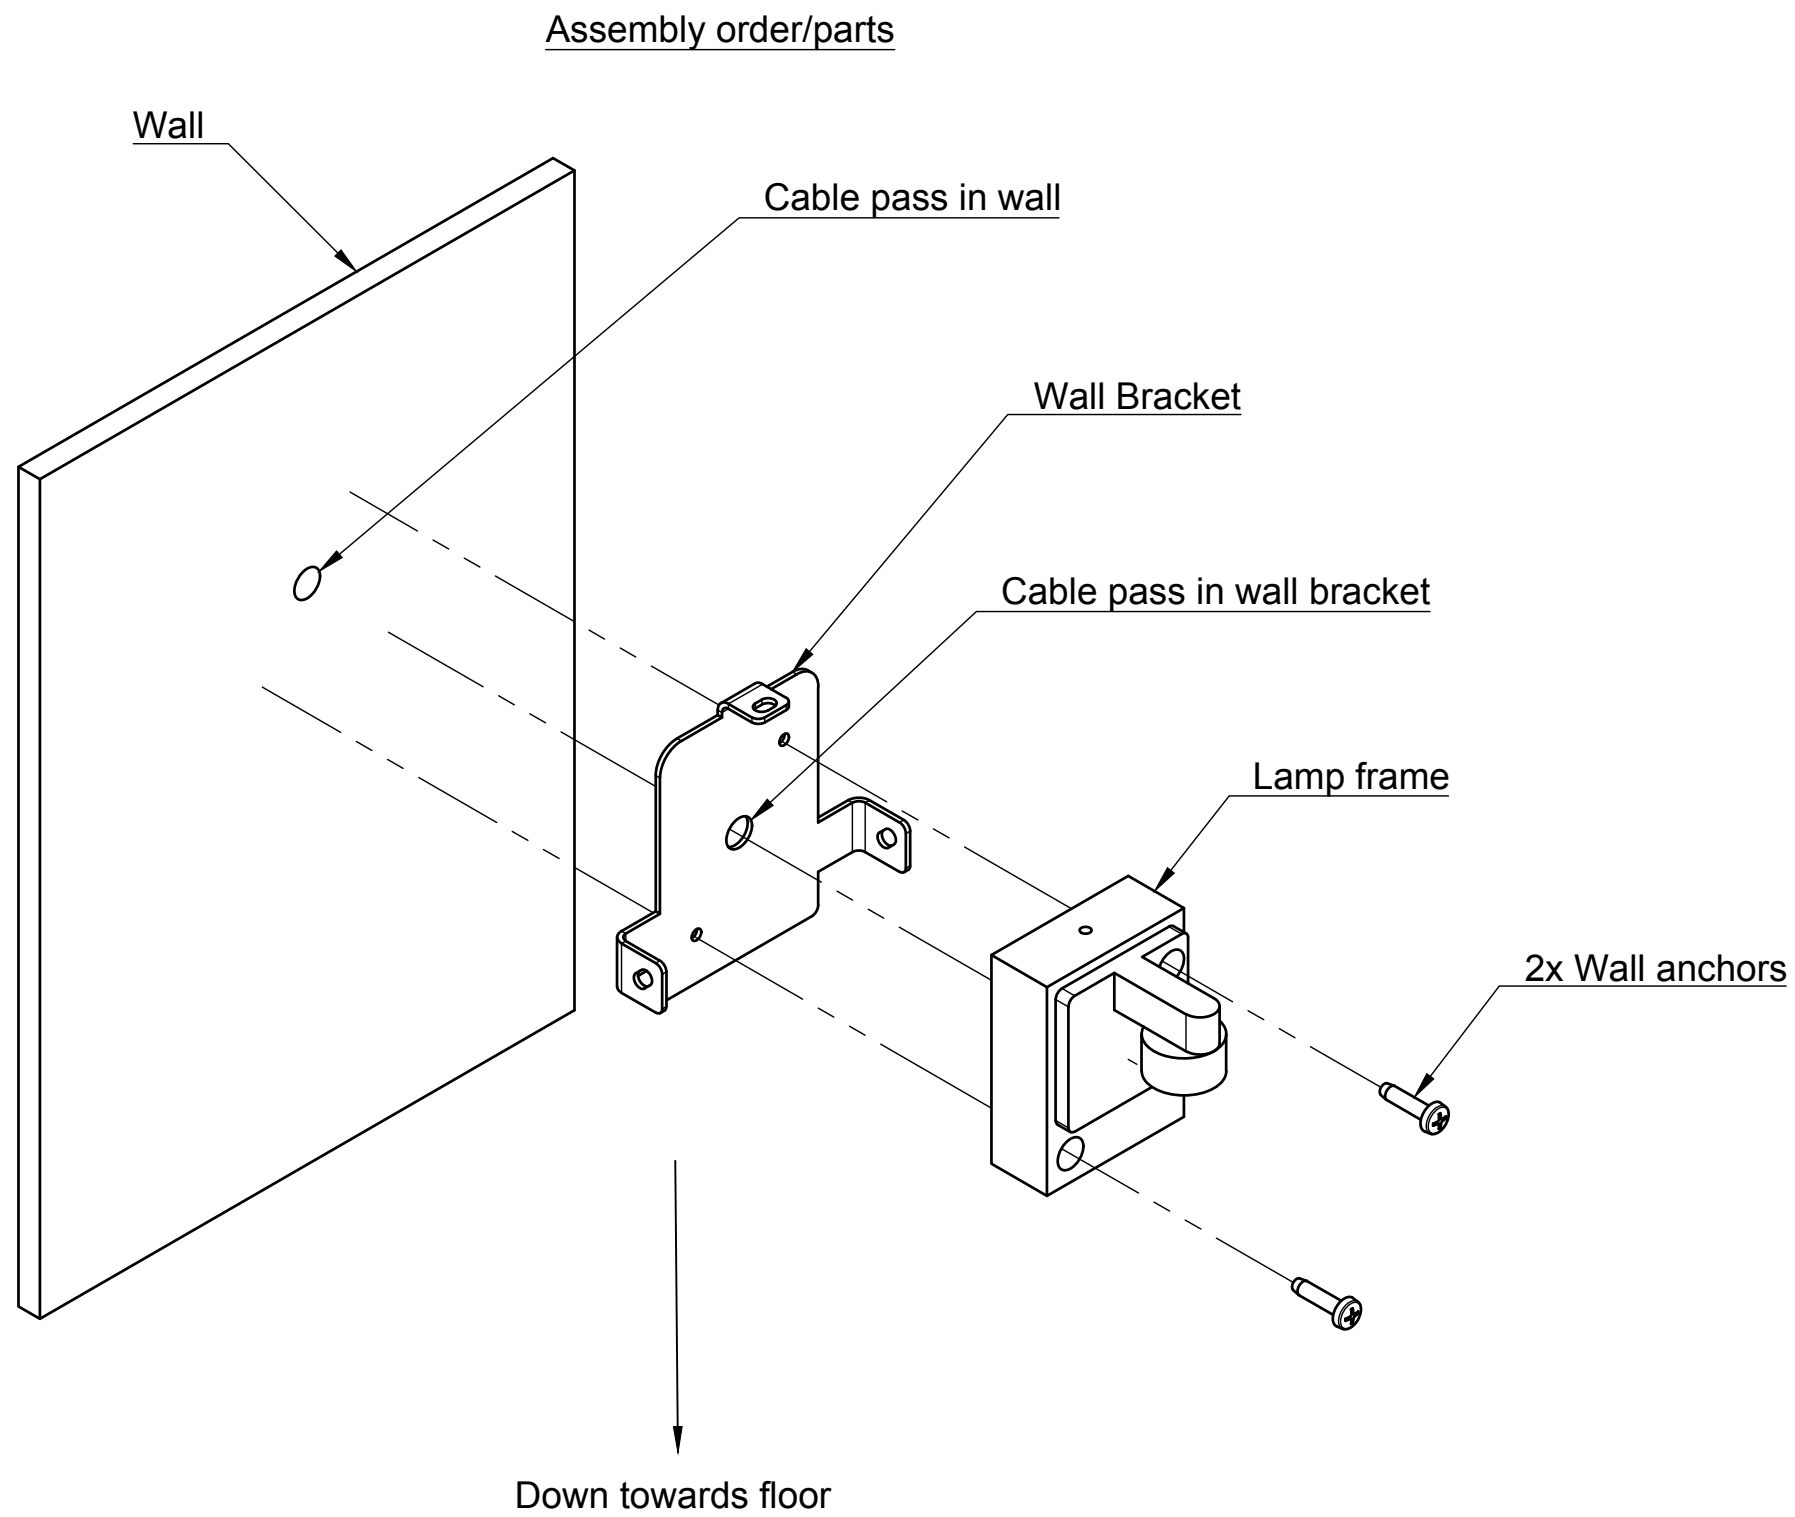

Outdoor Elbow Install Guide

Step 1 - Install wall bracket and lamp frame to wall

Using suitable wall anchors, fix the lamp frame and wall bracket to the wall. The light must be mounted in the downward orientation for outdoor use. Please ensure that the parts are installed in the orientation shown below.

Please feed the wires from the wall through the wall bracket cable pass and grommet on the lamp frame. Proceed to terminate the wires in the strip terminal on the lamp frame.
