WEIGHT

Small
(300G / 10.6oz)

Large
(700G / 24.7oz)

CLEANING INSTRUCTIONS

I. LEATHER

Our leather range is crafted from vegetable-tanned saddle leather imported from Italy, which is thick and highly durable. The tanning process, which employs botanical tannins, facilitates the development of a unique, burnished patina and character as each piece ages. When kept clean and dry, each will serve its intended purpose for generations.

All leather objects require attentive care, and it is advisable to keep them well away from dust, moisture and chemicals. They are best maintained by regular wiping with a clean, soft cloth. Please note that exposure to direct sunlight will hasten darkening of the surface.
