

Tissue Box - Assembly Guide

Step 1
Open the tissue cardboard packaging in the standard way by using the top opening.

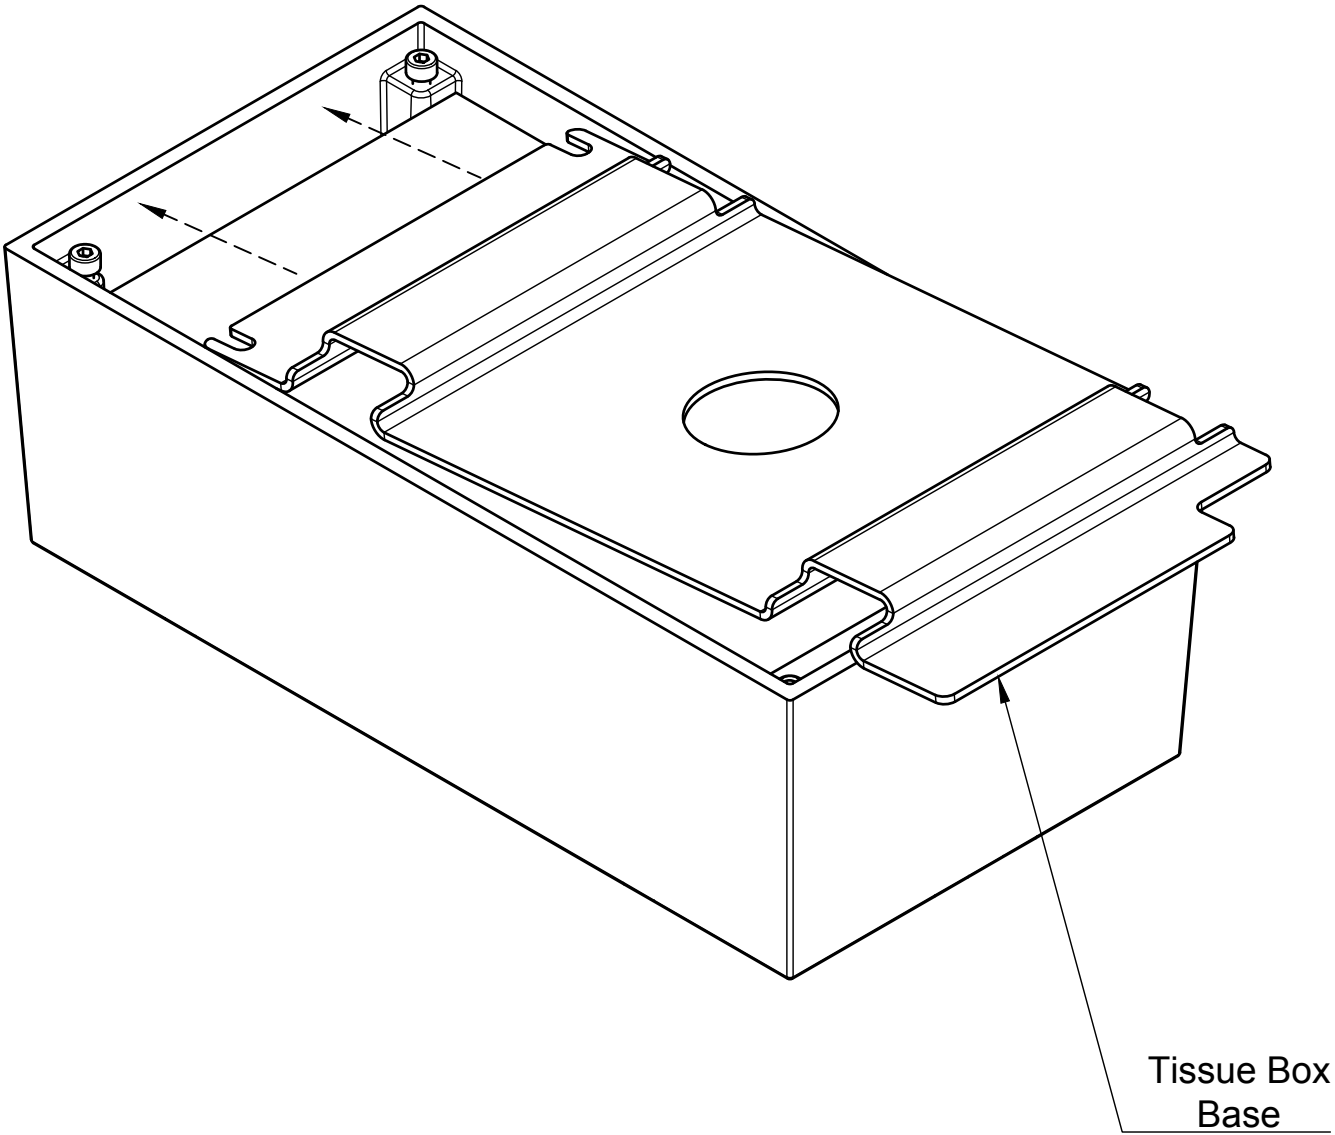

Step 2
Orient the tissue box in a way that is comfortable for you. Lower the tissue packaging into the tissue box, making sure to guide the first tissue through the opening of the tissue box.

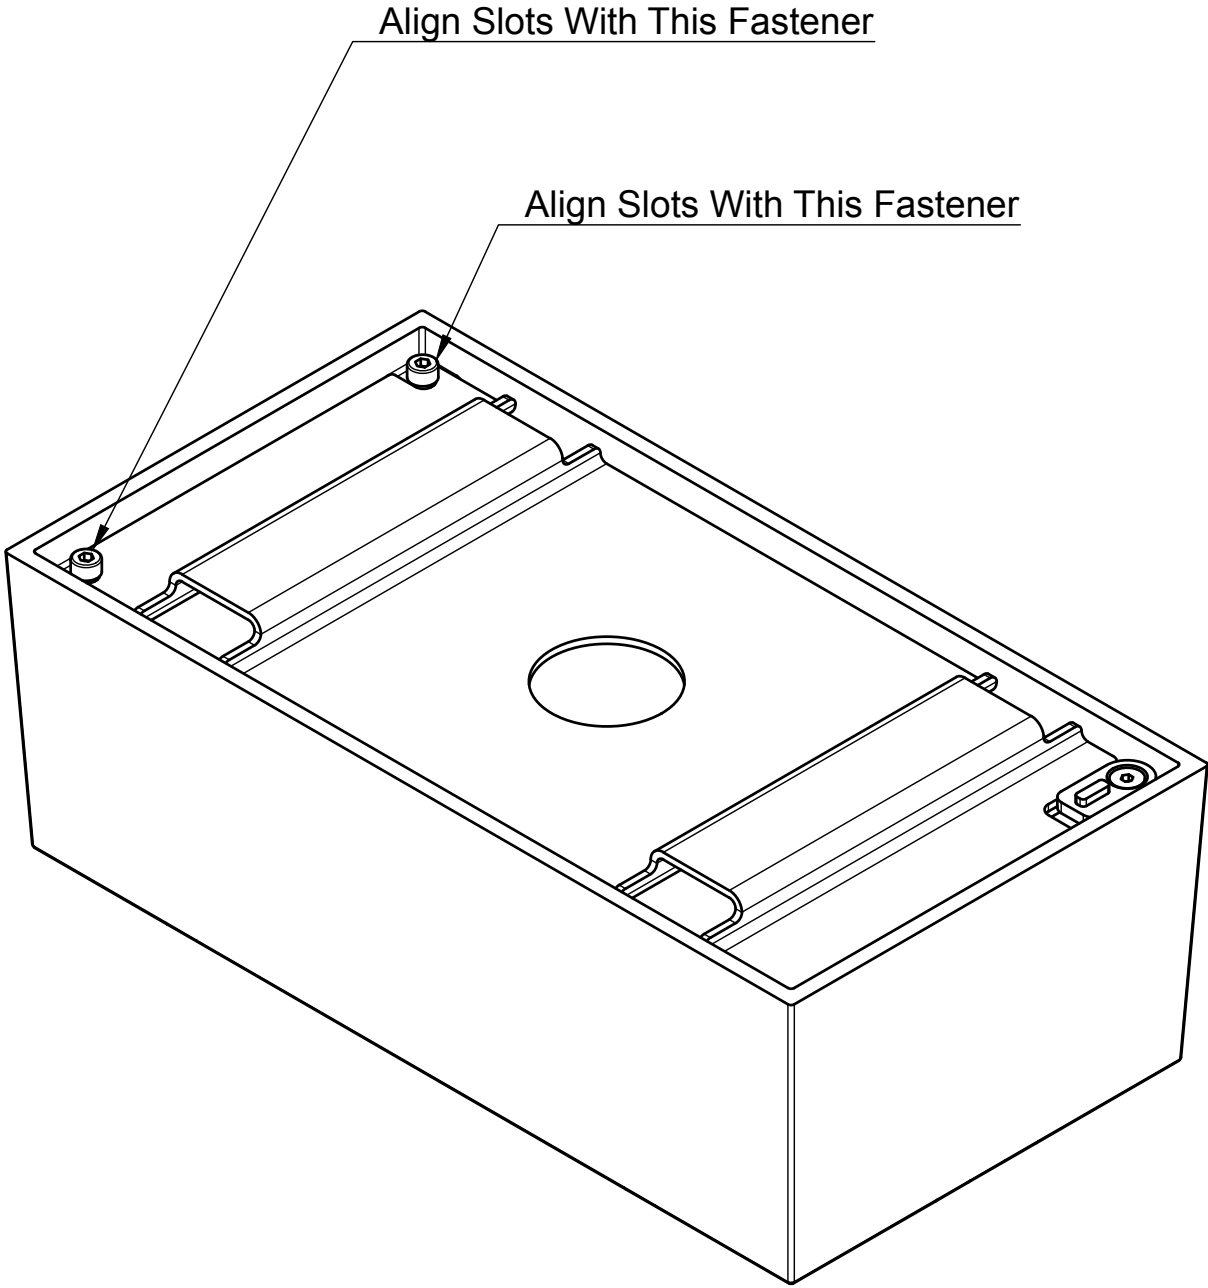

Tissue Box - Assembly Guide

Step 3
Angle the base of the tissue box and slide into the opening, sealing the tissue packaging in the tissue box.

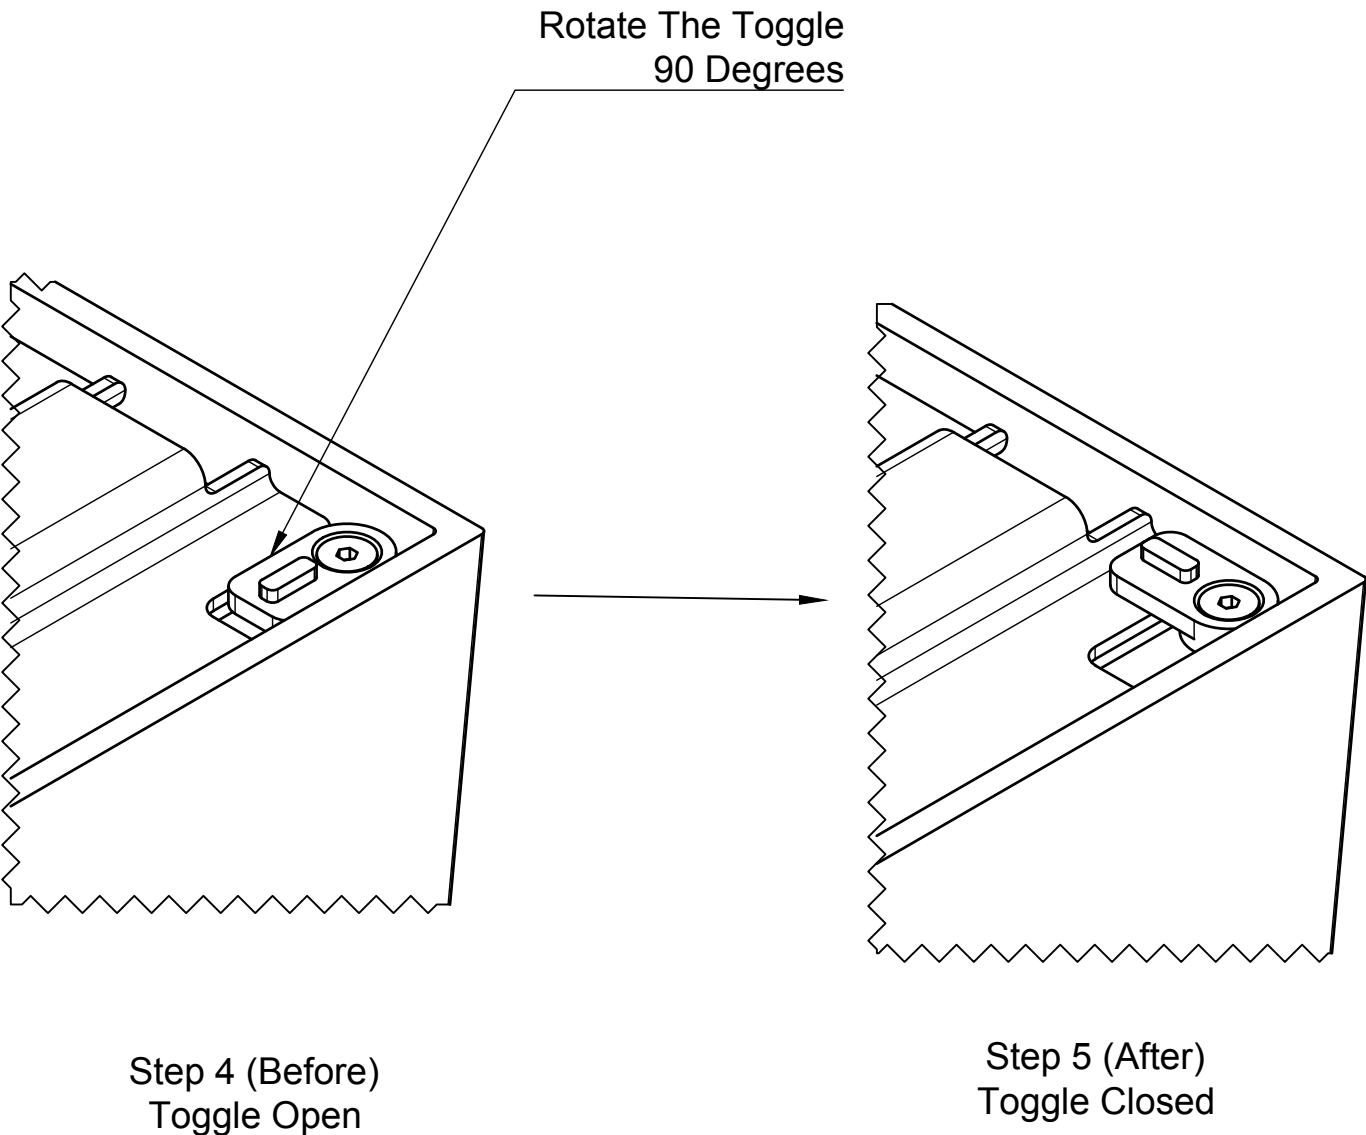

Step 4
While sliding ensure that the slots on the base of the tissue box align with the two fasteners on the edge of the tissue box. This will be installed correctly when the tissue box base sits level/flat on the tissue packaging.

Tissue Box - Assembly Guide

Step 5
Once the tissue box base is sitting level/flat on the tissue box, rotate the toggle in the corner of the tissue box to lock the base in place. This will retain the tissue packaging.

Step 6
Orient the tissue box upright and place in the desired location. Assembly is now complete. To change tissue packaging repeat steps in reverse order.
